

RAJU KUMAR

Senior Android Engineer

rajupraaa1234@gmail.com | 7903241183 | Hyderabad | Portfolio | LinkedIn | Github | leetcode

PROFILE SUMMARY

Senior Android Engineer with 6+ years of experience building scalable mobile applications across banking, fintech, and ed-tech. Strong expertise in Kotlin, Java, Jetpack Compose, Coroutines, MVVM, Clean Architecture, Dependency Injection, and modular Android development. Experienced in end-to-end feature ownership, API integration, testing, and production releases, with additional experience in React Native, Firebase, GCP, REST APIs, and AI-assisted developer tooling.

PROFESSIONAL EXPERIENCE

Software Engineer II | Lloyds Technology Centre 12/2023 – present | Hyderabad, India

- **Led end-to-end development of the Spending Rewards feature** for the Lloyds banking app, owning architecture, implementation, Retrofit-based API integration with GCP services, testing, and production release for offer activation, cashback redemption, and reward transaction tracking.
- **Architected and delivered a reusable modular Android SDK** using Kotlin, Jetpack Compose, MVVM, Clean Architecture, Coroutines, Flow, Retrofit, and Room, enabling independent feature development while improving code reuse and maintainability across teams.
- **Built an AI-powered PR review assistant** to automate Android code reviews against organization-specific coding standards, Kotlin best practices, and testing guidelines, improving review efficiency and code quality.
- **Owned multiple post-MVP enhancements**, including Featured Offers, Filter & Sort, Custom Intercept Surveys, and Cashback Transaction History, expanding feature capabilities and improving offer discovery.
- **Conducted code reviews and collaborated with cross-functional teams** to maintain architectural consistency, engineering standards, and high-quality production releases.

Software Engineer | Educational Initiatives 09/2021 – 11/2023 | Bangalore, India

- Developed and maintained the **Mindspark mobile application** using **React Native** for Android and iOS, delivering features including **Trusted Device, OTP Login, Screening Test, Dual Login Flow, and interactive learning modules** to support reliable and responsive learning experiences.
- Contributed to the **EiAsset native Android application**, an assessment platform used by **380,000+ students annually**, enabling online assessments, response submission, and access to detailed performance and leadership reports.
- Built scalable and testable Android features using **Kotlin, Java, Jetpack Compose, MVVM, Clean Architecture, and Dependency Injection**, with **unit testing** to improve maintainability and code quality.
- Integrated **REST APIs, Firebase Crashlytics, and Android platform components**, collaborating with backend teams to deliver secure, reliable, and production-ready mobile features.
- Managed application state using **Redux and MobX**, implemented **WebView-based learning content**, and collaborated on **Spring Boot microservices** to support end-to-end application functionality.
- Optimized the React Native application by upgrading the framework and replacing unnecessary third-party libraries with custom implementations, **reducing APK size from 32 MB to 25 MB (~22% reduction)** while improving application performance by **approximately 30%** and eliminating **SonarQube code smells**.

Software Engineer | MoneyTap 06/2021 – 09/2021 | Bangalore, India

- Developed and enhanced Android application features for the **digital lending platform** using **Kotlin, Java, and Android Jetpack components**, contributing to a secure and reliable customer experience.
- Worked on customer-facing flows including **user onboarding, authentication, loan applications, profile management, and payment-related features**, ensuring functional correctness and smooth user experience.
- Implemented Android modules following **MVVM architecture, Repository Pattern, and Clean Code principles**, with a focus on maintainable code and reliable feature delivery.

Software Developer Intern | Appventurez Mobitech 01/2021 – 06/2021 | Noida, India

- Contributed to the development of the **AstroBaBa** Android application using **Java**, delivering responsive and user-friendly features for astrology and consultation services.
- Implemented Android components following the **MVVM architecture** and integrated **Room Database** for efficient local data storage and offline support.

- Integrated RESTful APIs, **Firestore Cloud Messaging (FCM)**, push notifications, and live chat functionality to enable real-time communication and improve user engagement.
- Collaborated with senior engineers to troubleshoot issues, optimize application performance, and ensure timely delivery of high-quality Android releases.

EDUCATION

Master Of Computer Application,
National Institute of Technology Calicut
CGPA - 7.94

2018 – 2021 | Kerala, India

Bachelor Of Computer Application,
Admerite College (Magadh University)
Percentage - 64.2%

2015 – 2018 | Patna, India

SKILLS

Languages: Kotlin, Java, JavaScript, TypeScript, SQL

Android: Android SDK, Jetpack Compose, XML, Jetpack Libraries, Coroutines, Flow, Hilt, Dagger, Room, WorkManager, Jetpack Navigation, MVVM, Clean Architecture, Modularization, Repository Pattern, ProGuard, R8, ADB, Material Design, Git, Gradle

Networking & APIs: Retrofit, OkHttp, REST APIs, WebView

Testing & Code Quality: JUnit, MockK, Espresso, Unit Testing, SonarQube, Code Reviews

Firebase & Cloud: Firebase, Firebase Crashlytics, Firebase Cloud Messaging (FCM), GCP

Cross-Platform: React Native, Redux, MobX

Backend & Engineering: Spring Boot, OOP, SOLID, Design Patterns, Data Structures & Algorithms, Mobile System Design

AWARDS & CERTIFICATIONS

Engineering Excellence Award – Lloyds Technology Centre (2026) [🔗](#)

- Recognized for proactive ownership, engineering excellence, and resolving critical Android production issues.

EI Maestro Award – Educational Initiatives (2023) [🔗](#)

- For exceptional work in stabilizing the Mindspark Mobile App, reducing code issues, enhancing security, and delivering innovative solutions that significantly improved the product and development process.

Devathon – Educational Initiatives (2023) | Runner-Up

- Reduced the production app size from 32 MB to 25 MB within two days by optimizing dependencies and replacing unnecessary third-party libraries in the React Native-based Mindspark application. Improved application performance by approximately 30% compared to the previous version.

Advanced DSA Certification – Coding Ninjas [🔗](#)

Recognized for algorithmic problem-solving

LANGUAGES

- English, Hindi
