

RAJU KUMAR

Senior Android Engineer

rajupraaa1234@gmail.com | 7903241183 | Hyderabad | Portfolio | LinkedIn | Github | leetcode

PROFILE SUMMARY

Senior Android Engineer with nearly 6 years of experience building scalable mobile applications across banking, fintech, and ed-tech. Strong expertise in Kotlin, Java, Jetpack Compose, Coroutines, MVVM, Clean Architecture, Dependency Injection, and modular Android development. Experienced in end-to-end feature ownership, API integration, testing, and production releases, with additional experience in React Native, Firebase, GCP, REST APIs, and AI-assisted developer tooling.

PROFESSIONAL EXPERIENCE

Software Engineer II | Lloyds Technology Centre

12/2023 – present | Hyderabad, India

- **Led end-to-end development of the Spending Rewards feature** for the Lloyds banking application, owning Android architecture, Kotlin implementation, REST API integration using Retrofit, GCP service integration, testing, debugging, and production release for offer activation, cashback redemption, and reward transaction tracking.
- **Architected and delivered a reusable modular Android SDK** using Kotlin, Android Jetpack, Jetpack Compose, MVVM, Clean Architecture, Coroutines, Flow, Retrofit, and Room, enabling independent feature development and improving code reuse and maintainability across teams.
- **Built an AI-powered pull request (PR) review assistant** to automate Android code reviews against organization-specific coding standards, Kotlin best practices, architecture guidelines, and testing practices, improving review efficiency and code quality.
- Owned multiple post-MVP Android enhancements, including **Featured Offers, Filter & Sort, Custom Intercept Surveys, and Cashback Transaction History**, expanding application functionality and improving offer discovery.
- Conducted **code reviews, debugging, performance optimization, technical design discussions, and cross-functional collaboration** to maintain Android architectural consistency and engineering standards across production releases.

Software Engineer | Educational Initiatives

09/2021 – 11/2023 | Bangalore, India

- Developed and maintained the **Mindspark mobile application** using React Native for Android and iOS, implementing Trusted Device, OTP Login, Screening Test, Dual Login Flow, and interactive learning modules.
- Contributed to the **EiAsset native Android application**, an assessment platform used by **380,000+ students annually**, implementing online assessments, response submission, performance reports, and leadership reports.
- Developed scalable and testable Android features using **Kotlin, Java, Android SDK, Jetpack Compose, Android Jetpack, MVVM, Clean Architecture, Dependency Injection, and Unit Testing**.
- Integrated **REST APIs, Firebase Crashlytics, Firebase Cloud Messaging (FCM), WebView, and Android platform components**, collaborating with backend teams to deliver reliable production features.
- Managed application state using **Redux and MobX**, implemented WebView-based learning content, and collaborated with **Spring Boot microservices** for end-to-end application functionality.
- Optimized the React Native application by upgrading the framework and replacing unnecessary third-party libraries with custom implementations, **reducing APK size from 32 MB to 25 MB (~22%) and improving application performance by approximately 30%**, while eliminating SonarQube code smells.

Software Engineer | MoneyTap

06/2021 – 09/2021 | Bangalore, India

- Developed and enhanced **Android application features** for a digital lending platform using **Kotlin, Java, Android SDK, and Android Jetpack components**.
- Implemented customer-facing **user onboarding, authentication, loan application, profile management, and payment-related flows**.
- Designed Android modules using **MVVM, Repository Pattern, Clean Code, and SOLID principles**, focusing on maintainability, scalability, and reliable feature delivery.
- Collaborated with backend and engineering teams to integrate application functionality and troubleshoot production issues.

Software Developer Intern | Appventurez Mobitech

01/2021 – 06/2021 | Noida, India

- Contributed to the development of the **AstroBaBa** Android application using **Java**, delivering responsive and user-friendly features for astrology and consultation services.

- Implemented Android components following the **MVVM architecture** and integrated **Room Database** for efficient local data storage and offline support.
- Integrated RESTful APIs, **Firestore Cloud Messaging (FCM)**, push notifications, and live chat functionality to enable real-time communication and improve user engagement.
- Collaborated with senior engineers to troubleshoot issues, optimize application performance, and ensure timely delivery of high-quality Android releases.

EDUCATION

Master Of Computer Application, National Institute of Technology Calicut CGPA - 7.94	2018 – 2021 Kerala, India
Bachelor Of Computer Application, Admerite College (Magadh University) Percentage - 64.2%	2015 – 2018 Patna, India

SKILLS

Languages: Kotlin, Java, JavaScript, TypeScript, SQL

Android: Android SDK, Android Jetpack, Jetpack Compose, XML, Jetpack Libraries, Android UI, Material Design, Coroutines, Flow, StateFlow, Hilt, Dagger, Room, WorkManager, Jetpack Navigation, ViewModel, MVVM, Clean Architecture, Modularization, Repository Pattern, ProGuard, R8, ADB, Dynamic Feature Module

Architecture & Design: MVVM, Clean Architecture, Repository Pattern, SOLID Principle, OOP, Design Patterns, Modular Architecture, Mobile System Design

Networking & APIs: Retrofit, OkHttp, REST APIs, RESTful APIs, API Integration, WebView

Testing & Quality: JUnit, MockK, Espresso, Unit Testing, Integration Testing, SonarQube, Code Reviews, Debugging

Firestore & Cloud: Firestore, Firestore Crashlytics, Firestore Cloud Messaging (FCM), GCP

Cross-Platform: React Native, Redux, MobX

Build & Development: Git, Gradle, Android Studio, ADB

AI & LLM: LLMs, AI Agents, Prompt Engineering, OpenAI, Gemini, Claude, AI-Assisted Development

Core CS: Data Structures & Algorithms, Object-Oriented Programming

AWARDS & CERTIFICATIONS

Engineering Excellence Award – Lloyds Technology Centre (2026) 

- Recognized for proactive ownership, engineering excellence, and resolving critical Android production issues.

EI Maestro Award – Educational Initiatives (2023) 

- For exceptional work in stabilizing the Mindspark Mobile App, reducing code issues, enhancing security, and delivering innovative solutions that significantly improved the product and development process.

Devathon – Educational Initiatives (2023) | Runner-Up

- Reduced the production app size from 32 MB to 25 MB within two days by optimizing dependencies and replacing unnecessary third-party libraries in the React Native-based Mindspark application. Improved application performance by approximately 30% compared to the previous version.

Advanced DSA Certification – Coding Ninjas 

Recognized for algorithmic problem-solving

LANGUAGES

- English, Hindi
